

IT TRAINING PROGRAMS

Technology has touched human lives in every possible manner and keeps changing with each passing minute thereby making it necessary to learn new things and intensify knowledge of existing technologies. If you deep dive in to our daily lives, you would realize that we use minimal capacities

of software tools thus rendering substantial portion unproductive. This is mainly due to lack of training to use functions of such tools and software. Simply put, updating ourselves on technology is a necessity of business which we cannot let turn a blind eye.

Companies in the IT sector have project driven compulsions which needs serious and urgent training interventions. SLAs and Project requirements compel project managers to opt for training interventions in order to get their team readiness intact for timely deliverables. Such companies thrive on their ability to get their team trained in a short timeframe with

economical investments. Such companies find Edulight as a good training option where their team can be professionally trained and readied for project delivery. Edulight offers gamut of training programs which are focused towards IT professionals and End users.

This encompasses professionals viz software developers, networking pros, security pros etc who are busy developing codes and infrastructure for their clients. Edulight is a master in the bespoke category of training needs wherein we understand your project requirement in detail and provide you a Subject Matter Expert who can train your project team on the new niche technology and at the same time guide them to the new project. These SMEs are not normal trainers but experts who render their training services for the passion

of teaching new technologies to young IT aspirants. This is a path breaking model specifically designed to move away from standard trainers who despite their knowledge levels fall short of desired feedback due to their lack of project exposure. SME way is the Edulight mantra and the key differentiator that we offer you. So if you are looking at some meaningful depth oriented training programs through SMEs then please reach out to us at trainings@edulight.co.in or call us on 022-65502474.

TRAINING FOR IT PROFESSIONALS

TRAINING FOR NON IT PROFESSIONALS

We help the non-IT professionals gain digital competencies, training, knowledge and experience in various areas (for example, MS Office, cloud, mobile, applications (i.e. apps) and services, and digital platforms) necessary for them to use enabling technologies in their organizations, which will better enable them to plan, leverage and advise their

organizations for greater innovation, productivity and success in today's rapidly-changing, technology-enabled workplace. These programs are delivered in an user friendly and jargon free manner such that the learners are better equipped to use technology.
